

# PVC Banner

## Metamark MD-FLB2 – Blockout Double Sided Banner

Metamark MD-FLB2 is a lightweight 440gsm double sided banner PVC. The blockout membrane allows graphics to be printed on both sides without show through, so may be used for double sided banners, or as an alternative for rollup banner display stands. The product has a blue white tint coloration and both surfaces have an ultra smooth matt finish.

- 440gsm Laminated PVC
- Matt Finish
- Suitable for Double Sided Banners
- Fire Retardant to DIN 75200 < 100mm / min

1370mm	5m	30.20		
	30m	153.20	140.50	130.10

## Metamark MD-MB – PVC Mesh Banner

This 300gsm Mesh Banner overcomes the issue that some banners can have with wind resistance. The mesh structure allows wind to pass through while retaining 75% of the printable surface to give highly visual prints. Whilst it is a non self-adhesive product, it is supplied with an 'ink-stop' release liner to catch the ink during the printing process. It can also be used for scaffolding curtains, and is fire retardant. (Not suitable for use on Roland VersaCamm SP300 or VP300).

- 300gsm Mesh PVC
- Supplied with 'Ink Stop' Release Liner
- Fire Retardant to DIN 53359 A
