Metamark MD-TD – Textile Display Fabric

This promotional grade textile product has proved very popular for creating retail window displays and other point of sale displays, as an alternative to other PVC, paper or other rigid materials. It produces images that are non-reflective to overhead display lighting. It is fire retardant for indoor use.

- 280gsm MD-TD Textile Display
- Acrylic Coated Textile
- Fire Retardant to DIN 4102 B1
- Indoor Use
- Anti-Glare for Display Use

Metamark MD-MX – Heat Transfer Flex for Textiles

This high quality heat transfer flex is suitable for garment markings, such as promotional T shirts, sportswear and workwear. The high-quality polyurethane film has a matt, reflection-free surface laminated with a thermally activated adhesive. It is suitable for transfer to cotton, polyester and polyester / acrylic blend fabrics. It benefits from a low tack self adhesive liner, and is recommended to be used with a heat transfer press, and full temperature and pressure settings are available on the technical data sheet, or the web site. Apply using PT500X Application Tape.

- Flexible, Non Reflection, Matt PU Film MD-MX Heat Transfer Flex
- Heat Activated Adhesive
- Machine washable at 40° C
- Use With PT500X Application Tape
- For Use on Cotton, Polyester and Polyester/
Acrylic Blend Fabrics
