

Promotional and Display

Metamark MD-RU160 – Roll Up Polyester

This product has been developed for use with 'Roll Up' banner stand display systems, and can also be used for other exhibition and retail displays. It has a crisp, matt white surface and is scratch resistant. Its grey blockout backing gives maximum opacity and brilliant colour reproduction.

- 160 Micron MD-RU160 Roll-Up Polyester Matched Overlamine - MetaGuard 302
- Lightstop Polyester (Grey on Reverse)
- For Use With Retractable or Static Banner Stands

	30m	254.80	236.00	218.50

Metamark MD-RU170 – Satin Crystal Roll Up

MD-RU170 is an evolution in Roll Up Display Media. This synthetic product has a scuff resistant, satin crystal finish, so avoids the need for overlamination and therefore offering faster production at a lower cost. It is capable of producing vibrant colours, has a grey 'lightstop' backing and layflat properties.
