

Polish Metallics

Single Sided Silver & Gold Polish

Durability: Indoor Use Only

Polyester / PVC

A high gloss mirror finish film for application onto flat or slightly curved surfaces. The 125 micron product consists of a metallised polyester film which is laminated to a soft pvc allowing greater adhesion than polyester polishes. The product is top coated for screen printing, and is suitable for interior or short term exterior applications.

Roll length 50m

Double Sided Silver & Gold Polish

Durability: Indoor Use Only

Polyester

50 micron mirror finish polyester films suitable for producing reverse cut decals onto glass and can also be applied to any smooth, flat surface. While this product is suitable for indoor use only, it has medium term durability when applied to the inside face of external glazing. The product is supplied with a water based permanent acrylic adhesive, and care is needed when applying wet.
