

Decorative and Display

Holographic

Durability: Up to 1 year

Diffraction Polyester

A decorative film providing a 6mm mosaic holographic effect. The polyester film has up to one year exterior durability and is suitable for use on flat or slightly curved smooth surfaces.

MM-HOL Holographic

Width (mm)		1 - 24 m	25 - 49m	50 - 99m	100 - 199m	200 - 499m	500m +

Price £ plm

Roll length 50m

Carbon Fibre

Durability: 2 to 3 years

Carbon Fibre Effect

A printed 90 micron film which closely replicates carbon fibre. It has an exterior durability of 2 to 3 years with typical applications include vehicle detailing and decals, both interior and exterior.

MM-CF Carbon Fibre

Width (mm)		1 - 24 m	25 - 49m	50 - 99m	100 - 199m	200 - 499m	500m +

Price £ plm

Roll length 45m

Whiteboard

Durability: Interior Use

Dry Wipe White

Self adhesive white gloss vinyl typically used for creating dry wipe boards. The 160 micron film is designed for use with waterbased dry wipe markers and for use on interior applications. *(Test markers before use as some solvent based markers may cause a permanent stain.)*

MM-DW Whiteboard

Width (mm)		1 - 24 m	25 - 49m	50 - 99m	100 - 199m	200 - 499m	500m +

Price £ plm

Roll length 50m

Blackboard

Durability: 7 years

Embossed Chalkboard

An easy to apply alternative to traditional blackboard paint. The black 190 micron textured film accepts chalk*, which can be readily wiped clean.

**Not suitable for marker pens*

MM-BB Blackboard
