METAMARK
The Materials Company

metamark signvinyl and specialities

Metamark. The Materials Company

Metamark materials are trusted by the world's leading producers of signs and graphics. They are specified by leading brands' managers, and are insisted on by smaller businesses looking for quality and value too. You'll see Metamark materials everywhere there is a need to communicate a message with enduring quality.

Technical Leadership

Our class leading manufacturing, selection and conversion control processes guarantee the highest standards of quality, technical compatibility and consistency in the industry. Metamark's technical leadership is delivered as standard with every product we sell - so is our service and support philosophy. We build relationships and we're prepared to listen, so we ensure our products and services better reflect your needs and technical requirements.

Customer Satisfaction and Value

We manage every element of your experience in working with us; from product performance to state of the art order processing; delivery to ultimate customer satisfaction and value.

Order Direct

You can order direct from Metamark. Any order placed before 6pm will be delivered the next working day, and our stock position ensures excellent availability across our whole product offering.

Delivery Charges

Next Day Delivery	£7.95 but free if your order is over £100 net
Next Day Pre Noon	£3.00 surcharge
Next Day Pre 10.30am	£7.00 surcharge
Next Day Pre 9.30am	£15.00 surcharge
Saturday Pre Noon	£8.00 surcharge
Saturday Pre 10.30am	£12.00 surcharge
Saturday Pre 9.30am	£20.00 surcharge
Northern Ireland / Isle of Man	£11.50 but free if the order is over £130 net
Channel Isles	£29.50 but free if the order is over £200 net
Recorded Post	£2.00. Only available on small items.

Order direct from Metamark anytime up to 6.00pm for next day delivery with confidence that all materials are available from our comprehensive stocks. Additions can be made to orders at any time during the day and we offer a range of competitively priced timed delivery services. On each order the price band applied is determined by the total metrage or number of rolls on the order. You may add to your order as many times as required during the day. Your total order will determine the price break to be applied and whether the order qualifies for free delivery.

Orders to the UK mainland are despatched to arrive before 5.30pm the next working day. We also offer a range of competitively priced timed delivery upgrades. Deliveries to Northern Ireland and Isle of Man are 2 day, to Channel Isles are 3-4 day, and these deliveries cannot be guaranteed.

Payment Methods

We will be pleased to consider opening a credit account which will allow payment at 30 days net, subject to status, and we also accept payment by MasterCard, Visa and American Express (2.5% charge) credit cards and Maestro debit cards.

Sample Service

We understand how important it is to you to be able to provide your customer with the necessary colour samples the next working day. We offer free A4 samples which will be sent the same day by first class post if requested by 4pm.

Sales Office Hours

The Sales Office is open continuously from 09:00 to 18:00 from Monday to Friday.

Metamark SignVinyl is nothing less than the perfect reflection of Metamarks' years of experience in making the best sign and graphic materials money can buy.

Our SignVinyl is designed to perform as well in your hands as it does in its intended application. So however complex the job and whatever the colour, Metamark SignVinyl cuts cleanly. We've made weeding easier too with performance tuned liners offering just the right release characteristics and adhesives that resist the effects which make other vinyls difficult to work with.

Metamark SignVinyl is always available in a huge range of contemporary and classic colours. So whether you need to produce signing that's a visually co-ordinated component of its surroundings, or something that's a powerful counterpoint, you'll get it done with Metamark SignVinyl.

Metamark SignVinyl is available in a range of performance types too. If you needed enduring long term quality in a challenging application environment, Metamark has the product you need. If you have a need for something that offers top quality in the medium term, Metamark is all you need to know.

Metamark SignVinyl is always on our shelves and ready to supply. Order what you need, when you need it. Count on Metamark - we keep the largest stocks - so you don't have to.

Opaque Sign Vinyls

Metamark 7 Series – High Performance Calendered Vinyl

Metamark 7 Series is a high performance calendered vinyl developed for vehicle graphics, window decals, and long term computer cut applications onto flat or slightly curved surfaces. The soft handle 70 micron face film offers ease of weeding, while the high grade solvent based adhesive allows wet application and clean removal. The product also benefits from a layflat PE liner. Exterior durability is 8 years for black and white, 7 years for colours and 5 years for metallic colours. M7-100C white gloss has a blue contrast liner.

- Durability up to 8 years
- 70 micron Polymeric Calendered
- Permanent Clear Solvent Adhesive
- Fire Rating: Class B
- Suitable for flat or simple curves

Etch Glass Effect

Metamark Frost	Etch Glass Film	4.1
Metamark Crystal, Dusted and Silver Etch	Premium Etch Glass Film	4.2
3M™ Dusted and Frosted Crystal	Cast Etch Glass Film	4.2

Metamark Frost – Etch Glass Film

Metamark Frost is an opal etch effect vinyl suitable for glass manifestation and privacy screening, replacing traditional acid etching. The smooth, consistent finish provides a striking effect when producing decals, graphics or for architectural use when covering complete areas of glass. Metamarks' proprietary solvent adhesive system ensures sparkling results without a trace of adhesive visibility, and allows easy wet application.

- Outdoor Durability 3 years
- 80 Micron Etch Glass Film
- Permanent Solvent Adhesive
- Fire Rating: Class B
- Light Transmission 85%

Etch Glass Effect

Metamark Crystal, Dusted and Silver Etch – Premium Etch Glass Films

Metamark's premium quality etched glass effect vinyls are available in three distinctive finishes. Each of these window films provide a striking effect when producing decals, graphics or for architectural use when covering complete areas of glass. The permanent solvent adhesive allows wet application and clean removal. Crystal Etch offers a distinctive glitter effect, Silver Etch gives higher opacity and greater definition for text, while Dusted Etch is more subtle and provides a higher level of visibility.

- Durability up to 7 years
- 70 Micron Polymeric Glass Film
- Permanent Solvent Adhesive
- Fire Rating: Class B
- Light Transmission: Crystal 57%, Dusted 80%, Silver 56%

M5000 Reflective – Engineering Grade

M5000 series is a high quality engineering grade reflective suitable for safety signs and high visibility vehicle markings, where permitted. It offers ease of application due to its robust PET type film, so does not suffer the brittleness or tearing common to applying reflective materials. It has a 7 year exterior durability. It is suitable for application on flat panels or simple curves and can be computer cut. (Not suitable for use on compound curves or recesses.)

- Durability 7 years
- 120 micron PET Film
- Engineering Grade Reflective

Solar Window Tinting Films

Window Tint

Solar Film for Buildings / Vehicles

8.1

Window Tint – Solar Film for Buildings / Vehicles

These professional grade window tinting films are available in three finishes, for vehicle or architectural use. They reduce solar heat gain, light transmission and the effect of damaging ultraviolet rays. They can be used to provide one-way visibility or to improve the appearance of glass panels. All three films can be used on vehicles but only on the rear and rear side windows and they may also be used on other toughened glass. They may not be used on the windscreen or front side windows of vehicles. For building use, such as offices and conservatories V-MR20 may be used, where it's lower heat absorption minimises the risk of cracking. It is not to be used on wire glass. Care must be taken when fitting these films to glazing. In extreme cases the heat absorption and other factors such as shading can cause glazing to crack. If in doubt, contact the sales office for more advice. Performance data and application advice is shown on the data sheet available from www.metamark.co.uk

- Durability 5 years Internal
- 50 Micron Polyester Film
- Professional Window Film

It is the responsibility of the installer to establish suitability of these films

R Tape 4775 Conform® - Premium High Tack Paper Application Tape

R Tape 4775 Conform® is a premium grade high tack application tape with a heavyweight saturated paper. It has a slightly higher grab and adhesive coat weight making it well suited for use with embossed vinyls or intricate details. The tape has improved resistance to room moisture, ensuring consistent performance.

- Conform® Layflat Heavyweight White Paper
- Adhesion ~ 2.0 N/cm
- Premium High Tack

Metamark M2060 - Transparent Application Tape

This standard tack transparent application tape provides high visibility to give easier positioning when overlaying graphics, and is suitable for most signmaking applications. It is dimensionally stable and easy to unroll. It is plasticiser resistant, suitable for wet application, and can be removed easily without leaving residue.

- Transparent Film
- Adhesion ~ 1.1 N/cm
- Standard Medium Tack

Edge® Foils

Duracoat® Cartridges	Thermal Foils for the Gerber Edge™	10.1
Duracoat® Refills	Thermal Foils for the Gerber Edge™	10.2

Duracoat® Cartridges – Thermal Foils for the Gerber Edge™

Duracoat Cartridges offer a proven, high quality and low cost alternative to original Edge™ foils. They offer exceptional print quality and long term colour fastness. Benefits of the Duracoat foils include lengths from 23m to 92m, and an anti static backcoat to extend the print head life and reduce dust. The 50m cartridges provide 10% more than an original Edge foil. The U.V. Guard adds +1 year to the performance life. The white is super opaque. The Cartridges may be refilled using Duracoat Refills to further improve cost effectiveness.

- Durability 3-5 Years
- Anti Static Backcoat
- Outstanding U.V. Stability
- Compatible with any Duracoat Cartridge

Handling and Applying Sign Vinyl

Handling and Storage

Store vinyl on its end or suspended to avoid pressure marking, ideally +10°C to +30°C and 50% RH. The recommended application temperature for applying vinyl using a 'dry application method' is at least 10°C and for a 'wet application method' is at least 17°C. Application in temperatures below 5°C is not recommended.

Suitable Surfaces

Most smooth flat 'high energy' surfaces such as stainless steel, aluminium, glass or acrylic are suitable for Metamark Sign Vinyl. Low energy plastics such as polypropylene or embossed plastics are not suitable. Polycarbonate can present out gassing. Care is needed when applying to cold glass using a wet method, as tack levels will be very low. Powder coatings and other painted surfaces are ideal but paint must be fully cured first, and the paint must be correctly applied. Refer to website for more information; it is the responsibility of the installer to ensure the surface is suitable.

Films and Adhesives

Films

Calendered Vinyls may be applied to flat or slightly curved surfaces. They have a 'memory' so should be applied to curves without stress, and are not recommended for conforming into recesses by the use of heat.

Polyesters are semi rigid so should only be applied to smooth, flat or single curved surfaces. Reflectives comprise a glass resin composition so are very brittle on removal.

Adhesives

Metamark solvent based permanent adhesives allow trouble free wet application and long term durability in all conditions. These high quality adhesives allow relatively clean removal after use. Our repositionable adhesives provide a lower tack and clean removal in the short term. Solvent-free adhesives are water based, and wet application should be avoided to prevent them going milky.

Further advice can be found on our web site at www.metamark.co.uk/technical

signvinyl[®]

Warranty

Metamark (UK) Limited warrants to its customers that completed decorative markings which utilise Metamark SignVinyl, will remain in good condition without excessive fading or colour degradation for the specified life time of each material when correctly stored and applied in accordance with procedures outlined in the technical literature.

If within the specified years of normal use Metamark SignVinyl becomes ineffective for its intended use, then Metamark will provide sufficient material to produce a new replacement marking, and will also, at its own discretion, contribute an allowance in additional material towards the costs involved in replacing the graphics.

Aknowledgements

Metamark would like to kindly thank for the use of images; AJ Signs (Guildford), Allen Signs (Lincoln), Alligator Signs (Barnsley), MediaFleet (Warwickshire), Signhouse (Sheffield) and S&S Signs and Graphics (Barnsley).

Metamark are an environmentally responsible company. We constantly strive to reduce our environmental impact by continual improvement in our manufacturing processes.
