

The following instructions describe how to import Metamark media profiles into the RIP. If you need any further assistance please contact the sales office on 0845 345 5645:

- The Printer Configurations folders are stored on the PC running ColoRIP in a folder called \\ColoRIP\configurations\- To import the new configurations into the ColoRIP, copy the relevant folder to the printer (/configurations/<printer>) folder on the PC.
- When setting up the printer in ColoRIP, the Metamark Digital Media folder will now be available, along with all the media types therein.
