

## Product Description

Metamark MD-FL500 Digital Banner is a 500gsm premium grade PVC, suitable for a wide range of digital print banners, and has a smooth matt surface giving a high quality finish and a bright white colour. It can be used for exterior applications, and is fire retardant to suit interior applications. The product is fire retardant in accordance with DIN 75200.

## Typical Applications

MD-FL500 is durable for exterior applications, as well as fire retardant to suit interior applications. It should be printed on the smooth side, and is supplied reverse wound.

## Material Processing and Handling

To achieve the highest possible print quality please ensure that the correct profile is used. Most profiles are available and can be downloaded from [www.metamark.co.uk](http://www.metamark.co.uk). To avoid potential printing problems, always ensure that the material has reached room temperature and a relative humidity of 50% before printing. It is imperative that the printer is set up correctly and that the correct profile and heater settings are used. Do not handle the face directly and ensure it is free from dust and static. For a comprehensive list of printers compatible with MD-FL500 Digital Vinyl refer to the website.

### Fabric Specifications

Weight	500gsm reinforced PVC
Basic Fabric	Polyester
Tensile strength	657 N/5cm (warp) / 737 N/5cm (weft)
Elongation	14.1 % (warp) / 20.7 % (weft)
Tear Strength	105 N/5cm (warp) / 194N/5cm (weft)

### Roll Presentation

Roll sizes	760mm x 30m 1370mm* x 25m 1600mm x 30m
Presentation	Face film inwards

\*Also available wound on castellated core for Arizona 90/180 printers

**Warranty:** Metamark (UK) Limited warrants to its customers that graphics produced using Metamark DigitalVinyl will remain in good condition without excessive fading or colour degradation for the specified life time of the ink used, when correctly stored, printed and applied in accordance with procedures outlined in the technical literature. If within the specified years of normal use Metamark DigitalVinyl becomes ineffective for its intended use, then Metamark will provide sufficient material to produce a new replacement marking, and will at its own discretion, contribute an allowance in additional material towards the costs involved in replacing the graphics. In all cases, the converter is held fully responsible for storing, processing and applying the unconverted materials in accordance with Metamark's technical specifications. Metamark (UK) Limited will not be liable for any indirect or consequential loss or damage, and will not provide any allowance against improper usage, application accident, negligence, chemical damage or improper repair.

**Please Note:** The above data is given in good faith to provide an indication of the performance of the product. Purchasers should consider the suitability of each product for its intended use and the purchaser assumes all risks in connection with such use. Seller shall not be liable for damages in excess of the purchase price of the product nor for incidental nor consequential loss.
