

Product Description

Metamark MD-FLB is a 550gsm blockout PVC banner fabric. The premium grade PVC has a black membrane to prevent show through. It can be printed on both sides to form a double sided banner (one side is slightly textured, and the other is smooth). The product has white colour satin finish. It is suitable for printers using solvent and eco solvent inks.

Typical Applications

This product is suitable for general banners, exhibitions or indoor displays, requiring no show through.

Material Processing and Handling

When producing a double sided banner please allow 24hours before printing the reverse. To achieve the highest possible print quality please ensure that the correct profile is used. Most profiles are available and can be downloaded from www.metamark.co.uk. To avoid potential printing problems, always ensure that the material has reached room temperature and a relative humidity of 50% before printing. It is imperative that the printer is set up correctly and that the correct profile and heater settings are used. Do not handle the face directly and ensure it is free from dust and static. For a comprehensive list of printers compatible with MD-FLB refer to the website.

Fabric Specifications

Weight	550gsm reinforced PVC
Type of coating	PVC
Base Fabric	100% Polyester

Roll Presentation

Roll sizes	760mm x 25m 1370mm x 25m 1600mm x 25m

Fire Rating	Fire retardant in accordance with DIN 4102 B1
External weathering	5 years unprinted. This refers to the unprinted vinyl when installed. Refer to ink manufacturer for durability of the finished product.

Warranty: Metamark (UK) Limited warrants to its customers that graphics produced using Metamark DigitalVinyl will remain in good condition without excessive fading or colour degradation for the specified life time of the ink used, when correctly stored, printed and applied in accordance with procedures outlined in the technical literature. If within the specified years of normal use Metamark DigitalVinyl becomes ineffective for its intended use, then Metamark will provide sufficient material to produce a new replacement marking, and will at its own discretion, contribute an allowance in additional material towards the costs involved in replacing the graphics. In all cases, the converter is held fully responsible for storing, processing and applying the unconverted materials in accordance with Metamark's technical specifications. Metamark (UK) Limited will not be liable for any indirect or consequential loss or damage, and will not provide any allowance against improper usage, application accident, negligence, chemical damage or improper repair.

Please Note: The above data is given in good faith to provide an indication of the performance of the product. Purchasers should consider the suitability of each product for its intended use and the purchaser assumes all risks in connection with such use. Seller shall not be liable for damages in excess of the purchase price of the product nor for incidental nor consequential loss.
