

Product Description

Metamark MD-TD is a promotional grade textile display product, for use on solvent inkjet printers. It benefits from being a highly flexible material that produces clean images, that are importantly non reflective to overhead display lighting.

Typical Applications

MD-TD has been developed for creating retail window displays, and other point of sale displays, as an alternative to other PVC, paper or other rigid materials. It is fire retardant for indoor use.

Material Processing and Handling

To achieve the highest possible print quality please ensure that the correct profile is used. Most profiles are available and can be downloaded from www.metamark.co.uk. To avoid potential printing problems, always ensure that the material has reached room temperature and a relative humidity of 50% before printing. It is imperative that the printer is set up correctly and that the correct profile and heater settings are used. Do not handle the face film directly and ensure it is free from dust and static. For a comprehensive list of printers compatible with MD-TD refer to the website.

Fabric Specifications

Weight	280gsm
Basic fabric	Textile
Type of coating	Acrylic
Tensile strength	1100 N/5cm (warp)/1300 N/5cm (weft)
Tear strength	150 N (warp) / 110 N (weft)
Light-fastness	TO DIN 54004
Cold resistance	-30°C
Heat resistance	+70°C

Roll Presentation

Roll sizes	760mm x 25m 1370mm x 25m 1600mm x 25m
Presentation	Face film inwards

*Also available on castellated core for Arizona 90/180 printers

Durability

Fire Rating	Fire retardant to DIN 4102 B1
External Durability	Indoor Use

Finishes

Finish Available	MD-TD	White Textile Display

Warranty: Metamark (UK) Limited warrants to its customers that graphics produced using Metamark DigitalVinyl will remain in good condition without excessive fading or colour degradation for the specified life time of the ink used, when correctly stored, printed and applied in accordance with procedures outlined in the technical literature. If within the specified years of normal use Metamark DigitalVinyl becomes ineffective for its intended use, then Metamark will provide sufficient material to produce a new replacement marking, and will at its own discretion, contribute an allowance in additional material towards the costs involved in replacing the graphics. In all cases, the converter is held fully responsible for storing, processing and applying the unconverted materials in accordance with Metamark's technical specifications. Metamark (UK) Limited will not be liable for any indirect or consequential loss or damage, and will not provide any allowance against improper usage, application accident, negligence, chemical damage or improper repair.

Please Note: The above data is given in good faith to provide an indication of the performance of the product. Purchasers should consider the suitability of each product for its intended use and the purchaser assumes all risks in connection with such use. Seller shall not be liable for damages in excess of the purchase price of the product nor for incidental nor consequential loss.
