Metamark House, Genesis Business Park, Woking, GU21 5RW, UK
Luneside, New Quay Road, Lancaster, LA1 5QP, UK

Warranty: Metamark (UK) Limited warrants to its customers that completed decorative markings which utilise Metamark SignVinyl will remain in good condition without excessive fading or colour degradation for the specified life time of each material when correctly stored and applied in accordance with procedures outlined in the technical literature. The data is given in good faith to provide an indication of the performance of the product. Purchasers should consider the suitability of each product for its intended use and the purchaser assumes all risks in connection with such use. Seller shall not be liable for damages in excess of the purchase price of the product nor for incidental nor consequential loss.

Performance you can trust

MM-CC
SERIES

Cylinder Cast Wrapping Film

MM-CC Series Colour Change Wrapping Film

MM-CC Series is a proven and highly effective full, or partial, vehicle wrap solution. This range enables a vehicle colour change without under-going expensive resprays and helps transform and customise a range of vehicles, including fleet and commercial.

MM-CC Series provides a non-permanent wrap solution, with clean and trouble-free application, along with minimal residue on removal. It is manufactured with a 100 micron film giving high abrasion resistance.

MM-CC Series comes in a wide range of colours, and special colour matches can be offered for projects such as fleet branding.

Why choose to colour change?

- Quick and cost-effective way to transform vehicles.
- Reversible, the film can be removed cleanly.
- Protection of original vehicle paintwork from sun and mild abrasions.
- Preserves the market resale of vehicles.
- Flawless finish is achieved as the conformable film reacts to all vehicle lines, curves, rivets and corrugations.
- Engineered for trouble-free application.

Adhesive Technologies

MM-CC Series is available with the choice of two adhesive technologies, designed to optimise ease of handling.

MM-CC Series

MetaScape® adhesive offers faster, trouble-free application of larger areas, for flat or curved surfaces. MetaScape® is suitable for dry application methods, resulting in a durable wrap that is ready much sooner after installation.

MM-CCG Series

MetaGlide® micro-channel adhesive offers both enhanced repositionability and a high final adhesion. This allows quicker and easier installation particularly on larger panels. Suitable for dry application methods.

Specifications

Face Film	Cylinder Cast
Gauge	100 Micron nominal
Adhesive	Permanent Solvent-Based Acrylic Application temperature of +10°C to +60°C Service temperature of -30°C to +110°C
Liner	MM-CC Series – Structured Layflat Kraft with PE coating MM-CCG Series – Structured Micro Channel PE Layflat
Durability	8 years black and white, 7 years colours, 5 years metallic Shelf life 2 years
Fire Rating	Self-Extinguishing
Dimensional Stability	<0.5% (48h at 70°C on aluminium)
Roll Presentation	1520mm x 50m
