Metamark SignVinyl is nothing less than the perfect reflection of Metamark’s years’ of experience in making the best sign and graphic materials money can buy.

Our SignVinyl is designed to perform as well in your hands as it does in its intended application. So however complex the job and whatever the colour, Metamark SignVinyl cuts cleanly. We’ve made weeding easier too with performance-tuned liners offering just the right release characteristics and adhesives that resist the effects which make other vinyls difficult to work with.

Metamark SignVinyl is always available in a huge range of contemporary and classic colours. So whether you need to produce signage that’s a visually coordinated component of its surroundings, or something that’s a powerful counterpoint, you’ll get it done with Metamark SignVinyl.

Metamark SignVinyl is available in a range of performance types too. If you needed enduring long-term quality in a challenging application environment, Metamark has the product you need. If you have a need for something that offers top quality in the medium term, Metamark is all you need to know.

Metamark SignVinyl is always on our shelves and ready to supply. Order what you need, when you need it. Count on Metamark – we keep the largest stocks – so you don’t have to.

Metamark 7 Series

High Performance Calendered Sign Vinyl

7
SERIES

Metamark 7 Series is a high performance calendered vinyl developed for vehicle graphics, window decals and long-term computer-cut applications onto flat or slightly curved surfaces. The soft handle 70 micron face film offers ease of weeding, while the high grade solvent based adhesive allows wet application and clean removal. The product also benefits from a layflat PE liner.

Exterior durability is 8 years for black and white, 7 years for colours and 5 years for metallic colours¹.

Metamark 7 Series features Apex adhesive as standard, for your assurance of high performance and clean removal. Our range includes the most popular shades requested by sign makers, from a wide selection of red and blue tones, to a mix of popular trending colours that are striking and make a statement.

SPECIFICATION

- Durability up to 8 years¹
- 70 Micron Polymeric Calendered
- Permanent Clear Solvent Adhesive
- Fire Rating: Class B
- Suitable for flat or simple curves

Our range of digital self-adhesive media is formulated to meet the industry's most exacting quality and application requirements on a wide range of vehicle and outdoor graphic applications.

Metamark MD5

High Performance Calendered Vinyl

MD5 is a high performance vinyl recommended for application onto most flat or curved surfaces such as vehicle graphics, fleet markings and retail signage. Start using Metamark MD5 in your printer and you could be forgiven for thinking you'd had a hardware upgrade. Simply put, no other polymeric calendered material can give you the amazing quality you'll get with MD5 across a whole range of inks - including Solvent, Eco-Solvent, UV and Latex – printers or applications. MD5 is a 70 micron vinyl with our clear Apex adhesive system, providing assurance of high performance and clean removal, from a permanent adhesive.

SPECIFICATION

- 70 Micron Polymeric Calendered Vinyl
- Permanent Clear Solvent-Based Adhesive

Metamark MD5-AB

High Performance Blockout Vinyl with MetaScape System

Metamark MD5-AB features the 'MetaScape' adhesive system, offering faster and easier application by providing air with an exit route from under the graphic, with greater repositioning during application. This is combined with a grey pigmented solvent-based adhesive to provide increased opacity and preventing the substrate colour showing through. Metamark's high performance 70 micron white face film with its distinctive coating technology produces outstanding print performance on Solvent, Eco-Solvent, UV and Latex printers.

Choosing the right MD5

Metamark MD5 is the market's leading digital media and it comes in several variations. Load a roll of Metamark's flagship digital media, MD5, into your printer and the results will make you think you've had a hardware upgrade. The MD5 series prints like no other pressure sensitive media, which is why it is the choice of big brands, sign producers, printer manufacturers and printer engineers the world over. The Metamark MD5 series comes in a number of variations that each has its own application spectrum. There is an MD5 for the jobs you do, no other media range gives you MD5 quality. Take a look over the next few pages to see the MD5 series and refer to our website for more information www.metamark.co.uk/metamark-md5.

MetaGuard 700

Premium Grade PVC Overlaminates

MetaGuard 700 is recommended for Metamark MD5 and as a matched overlaminate prevents tunnelling or delamination. The 70 micron polymeric film gives a high level of abrasion resistance and contains UV stabilisers. It can be used on flat or gently curved surfaces such as vehicle graphics. It is available in Gloss, Satin or Matt finish. Fire Rating Class B [BS EN 13501-1:2007.] MetaGuard 700 features the latest Apex adhesive.

SPECIFICATION

- 70 Micron Polymeric Vinyl
- Solvent-Based Adhesive
- Layflat PE Liner
- Fire Rating: Class B
- Protects Prints from Abrasion and UV

MetaGuard UV 700

Overlamine for UV prints

MetaGuard UV 700 is a 70 micron polymeric calendered vinyl overlaminate for use with UV Prints. The specially formulated solvent-based adhesive gives a high bond to the low energy surface of UV prints and overcomes silvering. Overlaminating with MetaGuard UV 700 provides increased resistance to abrasion and durability of the print and offers UV inhibitors. It is suitable for interior or exterior applications over flat or semi-curved surfaces, and available in Gloss or Matt finish.

Selecting the right media is crucial in meeting the expectations of customers and delivering the best end result.

Choosing to add an overlaminate is also very important.

Metamark Overlaminates are specifically matched to the range of Metamark Digital Media, ensuring consistent results, free from potential tunnelling or delamination.

More information about our full range of Overlaminates can be found on our website – www.metamark.co.uk.

¹ This refers to the overlaminate and not the protection that it gives the printed image.

Metamark MD-i

Performance Calendered Digital Vinyl

Metamark MD-i has been developed for medium term applications onto flat or simple curves, including vehicle graphics. The product features a 70 micron polymeric calendered film and Apex solvent adhesive, giving 5 years outdoor durability.

MD-i utilises Metamark’s distinctive coating technology to offer outstanding print and colour vibrancy, with Solvent, Eco-Solvent, Latex or UV inks.

SPECIFICATION

- 70 Micron
- Permanent Clear Solvent Based Acrylic
- Layflat PE Liner
- Fire Rating: Class B
- Protects Prints from Abrasion and UV
- Durability 5 years (unprinted)¹

Roll Widths Available			
	760mm	1370mm	1600mm
50m	■	■	■

PRODUCT RANGE

- MD-I-100
- White Gloss
- MD-I-105
- Clear Gloss

Print Compatibility:
Solvent, Eco-Solvent,
Latex and UV inks

Full Roll Length 50m

¹ Vertical Exposure in Northern European conditions. For other climates, please refer to our Durability Guide found on our website.

Metamark MD-i-AB

Performance Digital Vinyl with Grey ‘MetaScape’ Adhesive

Metamark MD-i-AB is a 70 micron polymeric calendered vinyl, with a grey pigmented adhesive to offer improved opacity, and prevent show through on surfaces with a strong base colour, or for covering previous graphics.. The ‘MetaScape’ adhesive system offers ease of application by providing air with an exit route from under the graphic, which makes for faster, trouble-free application.

MD-i-AB offers 5 years outdoor durability, and is ideal for medium term applications onto flat or simple curves including vehicle graphics. Suitable for printing with Solvent, Eco-Solvent, Latex and UV inks.

SPECIFICATION

- 70 Micron
- Permanent Grey Solvent Based Acrylic
- Layflat PE Liner
- Fire Rating: Class B
- Durability 5 years (unprinted)¹

Metamark MD3-B

Intermediate Grade Blockout Vinyl

Metamark MD3-B is an intermediate grade 5 year calendered self-adhesive vinyl for printers using Solvent, Eco-Solvent, UV and Latex inks. The product features a grey pigmented solvent-based adhesive to provide increased opacity and image brilliance. MD3-B can be used for interior and exterior applications on flat or gently curved surfaces such as vehicle graphics and the grey adhesive provides increased opacity to obscure the substrate. It is not suitable for application over rivets or complex curves.

Metamark MDP

Promotional Grade Vinyl

Metamark MDP has a 100 micron film and a permanent adhesive. It has been developed to offer more rigidity when performing 'print and cut' work. It also offers easier application to flat panels and is therefore suitable for larger promotion prints, that can be applied easily. It resists edge curling and delivers MD-Class results every time, brilliantly suited for producing labels.

SPECIFICATION

- 100 Micron Monomeric Calendered Vinyl
- Permanent Clear Based Solvent-Based Adhesive
- Durability 4 Years (unprinted)¹
- For Print and Cut, or Flat Panel Application

Metamark MDP-HB

High Tack Blockout Vinyl for Low Energy Surfaces

MDP-HB has a high tack adhesive to solve the problem of adhesion onto smooth low energy surfaces, such as Polypropylene, Polyethylene and ABS, as well as for durable graphics on extreme sports equipment. The 100 micron film makes it suitable for print and cut labels and easy application. The grey pigmented solvent-based adhesive provides increased opacity, so as to obscure the substrate. It also offers an ideal solution for printable wall coverings, enhancing the opportunities available for wall décor. Finish offers brilliant colour reproduction on Solvent, Eco-Solvent, Latex and UV Printers.

SPECIFICATION

- 100 Micron Calendered Film
- High Grab Blockout Adhesive
- Durability 4 Years (unprinted)¹
- For use on Low Energy Surfaces such as PP, PE, ABS

MetaGuard 300

Intermediate PVC Overlamine

MetaGuard 300 Series is the matched laminate for Metamark’s MD3 media and delivers mutual conformability and weathering so actively preventing tunnelling or delamination. MetaGuard 302 Matt has greater improved clarity, maximising the definition and colour vibrancy of your prints. It offers an anti-reflection finish and provides superior abrasion resistance for both interior and exterior applications. The 70 micron film gives a high level of abrasion resistance and contains UV stabilisers. It can be used on flat or gently curved surfaces such as vehicle graphics. Fire Rating Class B [BS EN 13501-1:2007].

MetaGuard MGC

Premium Cast Overlamine

MetaGuard MGC is a premium cast overlamine, with a permanent solvent-based adhesive. When used together with its partnered print media, MetaCast®, it provides a matched system to prevent tunnelling or delamination. It is highly conformable with great ease of application and has been engineered to give long-term dimensional stability whilst providing durability to the print.

MetaGuard MGC has a 10 year durability and is assured by a MetaSure 10 Year Warranty.

SPECIFICATION

- 40 Micron Premium Cast Film
- Permanent Solvent-Based Adhesive
- 140gsm PE Layflat Liner
- Protects Prints from Abrasion and UV
- Suitable for Cold Lamination
- Durability 10 Years¹

Wrap Tools

Professional vehicle wrappers will appreciate our selection of Wrap Tool accessories, that have been meticulously chosen for their quality and usefulness.

Visit our website to view the full range available that includes items such as gripper magnets, application rollers, wrap gloves, knifeless tapes and thermal devices.

¹ This refers to the overlamine and not the protection that it gives the printed image.

MetaWrap MD-X

Cylinder Cast Digital Wrapping Media with Blockout MetaScape System

MetaWrap MD-X is a 50 micron Cylinder Cast digital wrapping media, supplied with the MetaScape air release adhesive system to allow quick and easy application on compound curves as well as moderate recesses.

The soft film has been developed to flow and conform over the most challenging surfaces so it's ideal for total vehicle wraps. The grey blockout adhesive ensures vibrant graphics and minimal substrate show through, as well as clean removal. The film offers high levels of dimensional stability and brilliant colour reproduction on Solvent, Eco-Solvent and Latex printers.

SPECIFICATION

- 50 Micron Cylinder Cast Film
- MetaScape Grey Adhesive (air release)
- Ease of application on 3D curves and moderate recesses
- Layflat PE Liner
- Durability 7 Years (unprinted)¹

MM-CC Series

Cylinder Cast Colour Change Wrapping Film

Metamark Colour Change film is a proven and highly effective full, or partial, vehicle wrap solution. For use on fleet, commercial and bespoke applications. It offers high abrasion resistance and paint protection to preserve the market resale value of the vehicle at the end of the contract.

The 100 micron film offers high opacity and resistance to colour fade during the wrapping process. The pigments in the film give long-term colour stability, providing a durable finish. Our MM-CC Series is now available with either MetaScape air release system, or MetaGlide® adhesive technology. Both allow quick and easy applications and provide additional peace of mind. The choice of adhesive will come down to the type and size of the vehicle you are wrapping so take into account curves, recesses and channels.

The Colour Change Series is available in a range of standard colours ex-stock and is alternatively offered to colour match for minimum quantities, for specific branding opportunities.

SPECIFICATION

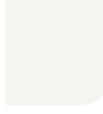

- 100 Micron Cylinder Cast Film
- MetaScape Air Release Solvent-Based Adhesive (MM-CC)
- MetaGlide® Micro Channel Solvent-Based Adhesive (MM-CCG)
- Full or Partial Wrap Film for Commercial, Fleet and Taxi
- Durability 8 Years¹

Digital print window manifestation, using simulated frosted or etched glass window films provide a striking effect, while one-way graphics can be created using our perforated window vinyl. Within our range you can select the most suitable window graphic film for your applications.

Metamark Crystal, Dusted, Silver Etch and Opal Haze

Premium Etch Glass Effect Films

Metamark’s premium quality etched glass effect vinyls are available in four distinctive finishes. Each of these window films provide a striking effect when producing decals, graphics or for architectural use when covering complete areas of glass. The permanent solvent adhesive allows wet application and clean removal.

Crystal Etch offers a distinctive glitter effect, Silver Etch gives higher opacity and greater definition for text, Dusted Etch is more subtle and provides a higher level of visibility while Opal Haze has been formulated to provide a whiter, brighter, acid etched effect.

All of Metamark’s Etch Effect glass films are also suitable for digital printing to achieve a variety of results.

SPECIFICATION

- 70 Micron Polymeric Glass Film
- 80 Micron Polymeric Glass Film for Opal Haze

Metamark MD-CV100

Clear Vision (Perforated One-Way Film)

Metamark MD-CV100 is a perforated one-way vision film, supplied on a multi-layer release liner to offer improved print performance on Solvent, Eco-Solvent, Latex and UV printers. It has 40% open area and 1.6mm perforations. It is suitable for advertising applications on vehicles and buildings, maintaining visibility from the inside.

The black/white laminate has a clear adhesive to maintain full visibility through the holes. It can be applied on lightly curved surfaces like some rear windows of cars but it is not aimed to be deformed in 3D. Overlaminating is recommended to maintain visibility in wet weather.

SPECIFICATION

- 140 Micron Perforated PVC
- 1.6mm Perforations, 40% Open Area
- Removable Solvent-Based Adhesive
- Fire Rating M1 and B1 Certified
- Durability 2 Years (unprinted)

Window Tint

Solar Film for Buildings / Vehicles

These professional grade window tinting films are available in three finishes, for vehicle or architectural use. They reduce solar heat gain, light transmission and the effect of damaging ultraviolet rays.

They can be used to provide one-way visibility or to improve the appearance of glass panels. All three films can be used on vehicles but only on the rear and rear side windows and they may also be used on other toughened glass. They may not be used on the windscreen or front side windows of vehicles and only for interior use.

For building use, such as offices and conservatories V-MIRR may be used, where it's lower heat absorption minimises the risk of cracking. It is not to be used on wire glass. Care must be taking when fitting these films to glazing. In extreme cases the heat absorption and other factors such as shading can cause glazing to crack.

SPECIFICATION

- 50 Micron Polyester Film
- Professional Window Film
- Durability 5 Years Internal

Digital print brings vibrant colours and bespoke changeable graphics to decor wall and furniture coverings. Whether within cafés and restaurants, leisure or offices, the range of Metamark products have been developed to offer ease of use and durable high quality, vibrant coverings with performance you can trust every time.

Metamark MD-WA

WallArt

Metamark ‘WallArt’ offers an ideal solution for printable wall coverings, including retail and leisure, exhibition and home decor applications, enhancing the opportunities available for wall decor. The textured weave finish provides an attractive appearance without lamination and gives a highly vibrant print image. It retains greater intensity of the colours compared to traditional textile or paper-based products. The PVC film has high level of opacity and makes for no show-through on overlap joins. The MetaScape air release adhesive allows for ease of handling and a clean trouble-free installation. It is printable with Solvent, Eco-Solvent, Latex and UV printers.

Preparation Is Key!

Preparing your surfaces so they are ready for Metamark media is a key process. It should give you the confidence that you will get the most out of the media capability.

Metamark’s range of Accessories, including our Surface Preparation fluids makes the process easy.

Within the range is the ‘Silver Bullet’ Pro Wall Primer that has been uniquely developed for large format decor print applications. The ISA Product of the Year 2019 Winner, is recommended for use with Metamark DécorMark wall coverings and overcomes the variability of existing wall finished to ensure trouble wall graphic application. Visit our website to view all Metamark Accessories.

MetaGuard Decor

Textured PVC Overlamine

The MetaGuard Decor range of textured overlaminates provide a highly durable protection over Metamark Digital films. These wall covering films give peace of mind and scuff resistance in high traffic areas. The attractive textured finish hides many imperfections on the wall and enhances depth of colour to the print. The 150 micron polymeric films offer excellent dimensional stability.

SPECIFICATION

- 150 Micron Polymeric Vinyl
- Solvent-Based Adhesive
- Layflat PE Liner
- Protects Prints from Abrasion and UV
- Durability 7 Years¹

Metamark MD-MW-R9

‘MetaWalk’ Textured Floor Graphic

Metamark ‘MetaWalk’ is a textured media designed for temporary, floor graphics, applied to either smooth, indoor floor surfaces in good condition, or indoor short pile carpet. MD-MW-R9 is a one-part system, which can withstand regular levels of foot traffic and has an anti-slip finish tested in accordance with BS 7976- 2:2002 certification (Slider 96) and UK Slip Resistance Guidelines, as well as tested to DIN 51130:2014, achieving an R9 rating.

It is the responsibility of the installer to determine suitability and monitor any wear and tear. It gives a highly vibrant print image, retaining greater intensity of the colours and has a high level of opacity. The self-adhesive 170 micron PVC film allows for clean, easy handling and is printable with Solvent, Eco-Solvent, Latex and UV printers.

SPECIFICATION

- 170 Micron Calendered PVC

Metamark and Aura Optical Systems micro-prismatic retro-reflective and fluorescent films are engineered to deliver safe day time and night time viewing, as well as high visibility for signing, safety and conspicuity applications.

Our range of films can be used for both indoor and outdoor requirements, providing long-term durability and ease of handling.

The Metamark MD-RF7 Engineering Grade Reflective and Aura 139 Fluorescent Vinyl are compliant to many European regulations (where necessary) including vehicle markings and various applications.

Metamark MM-RF3

Commercial Grade Reflective for Signage and Advertising

Metamark commercial grade reflective vinyl is suitable for high visibility short-term applications, such as general signage and advertising. The enclosed lens glass bead technology is available in 6 high gloss finish colours and can be used for both indoor and outdoor applications. Featuring a PET face film, the MM-RF3 Series is easy to install, gives robust handling and does not suffer from becoming brittle in cold conditions.

Banner Finishing Tapes

Metamark has a selection of banner finishing tapes to help with banner production and installations.

The SmoothEdge Banner Tape is a premium banner finishing reinforcement tape, so no need for folding, hemming, sewing or welding. The EDGE-It® Banner Tape is a synthetic weave type reinforcement tape, making banner finishing quick and easy.

Metamark can also provide the VS Series which is our High Performance double sided filmic tapes. The VS1 is a clear PET high bond tape, ideal for PVC banner hemming and a great everyday product to make banners quick and low cost to produce.

MetaFlex

Banner Grade Vinyl

MetaFlex is a super soft vinyl for use on flexible PVC banners. The stabilised film resists plasticiser migration and creasing inherent to flexible PVC. MetaFlex has a soft sheen finish and a low tack adhesive to ease application. It offers 3 years exterior durability. Available in black and white finish. (Not suitable for application onto curtain sided vehicles).

Metamark MM-CB

Chalkboard Decor Film

Metamark MM-CB is a chalkboard film for use with conventional chalk or with suitable liquid chalk marker pens. The film is ideal for creating blackboard-effect areas that can be used for various purposes. It can be applied directly onto walls and other surfaces within the decor environment, as well as menu boards, notice boards and much more. It benefits from a wide roll format and a high grab adhesive. The product allows for a clean and easy installation, resulting in a professional finish. Markings can be wiped clean with a dry or damp cloth. The product can also be printed with UV Printers with white inks, for adding graphics to the film.

R Tape ApliTape™

Standard High Tack Paper Application Tape

A standard high tack paper application tape, R Tape ApliTape™ is a high quality product suited to general sign and graphic applications. R Tape’s products have long been recognised among other leading application tapes in the sign industry. ApliTape is designed to work well with a wet application method but must be removed before dry. The product exhibits no stringing and delivers a clean tear in use. R Tape ApliTape™ is supplied in 1220mm x 91.4m rolls.

SPECIFICATION

- Natural Rubber Adhesive
- Suitable for Wet Application
- 102-115 Micron

Roll Widths Available		
	610mm	1220mm
91m	■	■

R Tape 4075RLA Conform®

Standard High Tack Paper Application Tape

A standard high tack paper application tape suitable for most signmaking applications which also benefits the presentation and shipping of finished graphics to the customer or application site. R Tape 4075 Conform® benefits from a novel adhesive technology which allows it to adhere releasably to silicone such as exposed areas of liner. It resists tunnelling and edge curling when applied and It is perfect for the preparation of graphics that need to be dispatched for third party application. R4075 is suitable for wet application too.

SPECIFICATION

- Natural Rubber Adhesive
- Suitable for Wet Application
- Clean Removal without Hazing/Discolouring

Roll Widths Available			
	610mm	1220mm	1520mm
100m	■	■	■

Metamark M2060

Transparent Application Tape

Metamark M2060 is a transparent polypropylene application tape, allowing easy alignment whilst overlaying complex, multi-coloured graphics from cut components. It offers excellent visibility to the composite graphic underneath during use and is resistant to stretching which makes colour-to-colour registration much easier to maintain and layouts more accurate.

SPECIFICATION

- Standard Acrylic Adhesive
- Suitable for Wet Application
- 110 Micron

Roll Widths Available		
	610mm	1220mm
100m	■	■

R Tape 4761RLA Conform®

Medium High Tack Application Tape

A premium grade, medium tack application tape with a heavyweight saturated paper, R Tape 4761 Conform® is designed to aid the transfer and installation of small and large graphics. 4761 protects graphics printed with UV screen print inks and clear coats. Perfect for use with MetaScape® and MetaGlide® products.

SPECIFICATION

- Natural Rubber Medium High Tack Adhesive
- Suitable for Wet and Dry Application
- Adheres to MetaScape® and MetaGlide® Products

Roll Widths Available		
	1220mm	1370mm
100m	■	■

R Tape 4050RLA Conform®

Low Tack Paper Application Tape

A low tack paper application tape, R Tape 4050 Conform® allows easier release of larger graphics and those with high gloss levels and is also suitable for lifting printed graphics without the risk of damaging the print. The product has the benefits of the Conform® adhesion technology which adheres to exposed silicone and is suitable for wet application.

SPECIFICATION

- Natural Rubber Low Tack Adhesive
- Suitable for Wet Application
- Not for Outdoor Application

Roll Widths Available			
	610mm	1220mm	1520mm
100m	■	■	■

R Tape 4775RLA Conform®

Premium Grade Paper Application Tape

A premium grade high tack application tape with a heavyweight saturated paper, R Tape 4775 Conform® has improved resistance to ambient moisture thus ensuring consistent layout performance. It has a higher tack than the R 4075 or M2000 tapes so is ideally suited for use with embossed vinyl's, or intricate details. The product also features Conform® adhesive technology which adheres to exposed silicone liners.

SPECIFICATION

- Natural Rubber High Tack Adhesive
- Suitable for Wet Application
- Clean Removal without Hazing / Discolouring

Roll Widths Available		
	610mm	1220mm
100m	■	■

R Tape 4885RLA Conform®

Extra High Tack Paper Application Tape

An extra high tack heavyweight paper application tape, R Tape 4885 Conform® is suitable for use with even the most demanding, hard to lift materials, such as frosted etch effect vinyl's. The product also benefits from Conform® adhesion which adheres to exposed silicone liners without tunnelling.

SPECIFICATION

- Natural Rubber Extra High Tack Adhesive
- Superior Adhesive to uneven and Banner like Surfaces
- Trouble-free Application

Roll Widths Available		
	610mm	1220mm
100m	■	■

Metamark PT750X

'Textile' Application Tape

Metamark PT750X is a transparent Polyester application tape. It offers excellent temperature resistance and can be removed without leaving residue, even after long periods. It is suitable for thermal transfer of heat sealing materials and is matched to MD-MX.

SPECIFICATION

- Solvent Free Acrylic Adhesive
- Transparent PET
- Matched to MD-MX

Roll Widths Available	
	750mm
25m	■

Getting the most out of your media

Handling and Applying Sign Vinyl

Handling and Storage

Store vinyl on its end or suspended to avoid pressure marking, ideally +10°C to +30°C and 50% relative humidity. The recommended application temperature for applying vinyl using a 'dry application method' is at least 10°C and for a 'wet application method' is at least 17°C. Application in temperatures below 5°C is not recommended.

Suitable Surfaces

Most smooth flat 'high energy' surfaces such as stainless steel, aluminium, glass or acrylic are suitable for Metamark SignVinyl. Low energy plastics such as polypropylene or embossed plastics are not suitable. Polycarbonate can present out gassing. Care is needed when applying to cold glass using a wet method, as tack levels will be very low. Powder coatings and other painted surfaces are ideal but paint must be fully cured first and the paint must be correctly applied.

Handling and Storage of Digital Vinyl

Handling and Storage

Media can pressure-mark if stored on its side, resulting in discolouration bands in the finished print. Avoid this by storing on end and do not leave for long periods on the unwind rollers on the machine. Always ensure the media is free from dust and contamination, shown by dark specks or marks in the finished print. Store ideally at +10°C to +30°C and 50% relative humidity.

ICC Colour Profiles

Always use the correct profile for media. This will ensure prints free from banding or bleeding and will ensure accurate colour reproduction. The Metamark profile library on the website provides simple download bundles for each printer and RIP combination.

Retained solvents from the printing process affect the media

Allowing a minimum of 24-48 hours after printing for the solvents to evaporate before cutting, overlaminating or applying. Solvents weaken adhesives, soften vinyl films and can cause overlamine to fail.

Always choose the right product for the application

The substrate and application each place different demands on the media. For example, considerations should be made for vehicle contours, low energy surfaces, areas requiring fire ratings and for 'print and cut' applications. Always refer to the website and data sheets before choosing the media or application.

The durability shown refers to the unprinted media. For the durability of the finished print, refer to the ink and printer manufacturer.

Films and Adhesives

Films

Calendered Vinyls may be applied to flat or slightly curved surfaces. They have a 'memory' so should be applied to curves without stress and are not recommended for conforming into recesses by the use of heat. Polyesters are semi rigid so should only be applied to smooth, flat or single curved surfaces. Reflectives comprise a glass resin composition so are very brittle on removal.

Adhesives

Metamark solvent-based permanent adhesives allow trouble-free wet application and long-term durability in all conditions. Our repositionable adhesives provide a lower tack and clean removal in the short-term. Solvent-free adhesives are water based and wet application should be avoided to prevent them going milky.

Metamark Support

If you require any technical assistance both prior to purchasing Metamark media, or after installations, we are happy to help.

On our website you will be able to utilise a Live Chat function where you can talk with one of our technical team. You can also visit our technical section of our website where you will find various useful resources including FAQs, application guidelines, technical datasheets and much more. We have a dedicated technical email address you can send any queries technical@metamark.co.uk, or you can simply call our Customer Services team on 0345 345 5645 and someone will aim to assist you.

MetaSure Warranty

Metamark (UK) Limited warrants to its customer that graphics and markings produced using Metamark media and materials will remain in satisfactory condition for a term no less than that defined as the expected durability as detailed in Metamark's technical bulletins.

If within the term as outlined above, Metamark, at its sole discretion, judges that graphics and markings produced using its media and materials and manufactured and installed or fitted in accordance with its published methods and best practices, as amended from time to time, have suffered unacceptable degradation as defined below, Metamark will provide sufficient Metamark media and materials to enable the production of replacement graphics or markings, at no cost.

Metamark further warrants that its media and materials will be supplied free of defects incurred in manufacturing and undertakes to replace, free of charge, any materials it judges to be defective upon examination.

This warranty specifically excludes degradation and damage which Metamark judged to have been caused by improper application or unacceptable use, chemical or malicious damage or negligence, poor storage or handling.

Metamark will not be held liable for any further direct or consequential losses, implied or otherwise.
