

Metamark MM-CCG Series

Cylinder Cast Wrapping Film
with MetaGlide® Adhesive

MM-CCG Series features our MetaGlide adhesive technology, and is a professional wrap film for vehicle customisation, for use on fleet, commercial and taxi applications. The next generation micro-channel air release system gives optimal performance with enhanced repositionability, and high adhesive strength. This gives total confidence when fitting into 3D channels and recesses.

MM-CCG Series has a 100 micron durable film that can be removed cleanly at the end of the desired application and provides the added benefit of protection to the factory paint during use. It enables a vehicle colour change without under-going expensive resprays. Conforming to vehicle lines, curves and corrugations, the product is warranted for up to 8 years with the MetaSure warranty. Available in 1520mm width and a range of colours. Special colour matches can be offered for projects such as fleet branding.
