

METACAST[®] MDC XR[™]

CAST PRINTABLE VEHICLE WRAP FILM WITH XR[™] ADHESIVE SYSTEM

MetaCast[®] MDC XR[™]

Overview

MetaCast[®] MDC XR[™] is a premium cast printable wrap film engineered for high-performance vehicle applications. Its advanced MetaGlide[®] XR[™] adhesive system is designed to optimise repositionability and features micro-channel air-release technology, allowing installers to work more efficiently. The film provides outstanding reliability when conforming into 3D channels and recesses, giving complete confidence even on the most demanding surfaces.

In addition to its installation benefits, MetaCast[®] MDC XR[™] delivers exceptional print results and vibrancy, for impactful colour reproduction. Compatible with Solvent, Eco-Solvent, Latex, and UV* printing technologies. When paired with the MetaGuard MGC Overlamine Series, it provides a fully matched system, for maximum protection and visual performance. Backed by the MetaSure[®] warranty for up to 10 years, ensuring long-lasting results you can trust. MDC XR[™] is the ideal choice for demanding wrap projects where performance, reliability and installation confidence matter most.

*Some UV inks may not be suitable for conforming. Check compatibility prior to use.

METACAST[®] MDC XR[™]

CAST PRINTABLE VEHICLE WRAP FILM WITH XR[™] ADHESIVE SYSTEM

MetaCast[®] MDC & MetaCast[®] MDC XR[™]

MetaCast[®] MDC and MetaCast[®] MDC XR[™] are premium cast printable wrap films designed for full vehicle wraps, deep channels, and complex curves. Both deliver outstanding print quality, long-term durability, and professional installation performance. The key difference lies in the adhesive technology.

MetaCast[®] MDC

Deliver reliable, consistent results with MetaCast[®] MDC featuring MetaGlide[®], Metamark's proven micro-channel air-release adhesive system. Engineered for enhanced stability and smooth liner release, MDC offers wrap professionals the ultimate all-round performance for full vehicle wraps. Its familiar installation behaviour and dependable handling make it a favourite for installers who value precision, predictability, and long-term durability. MDC maintains a strong, versatile adhesive performance, delivering excellent temperature tolerance and a stable bond throughout the wrap's life, ensuring confidence from application to finish.

Choose MDC when you want:

- MetaGlide[®] adhesive technology delivering optimal performance with high adhesive strength
- Installer-familiar adhesive feel
- A high-performance, versatile film engineered for long-term results

MetaCast[®] MDC is the wrap film you choose when you want consistency, durability, and a proven performance you can trust on every project.

MetaCast[®] MDC XR[™]

Experience faster, smoother installations with MetaCast[®] MDC XR[™] featuring MetaGlide[®] XR[™], Metamark's advanced adhesive system engineered for optimised repositionability and effortless handling. Its innovative micro-channel air-release technology allows the film to glide with precision, making complex curves, deep recesses, and vehicle contours easier than ever to wrap. As the film sets, it develops a strong final bond, delivering exceptional durability where it matters most. Designed as a premium cast printable wrap film, MDC XR[™] accelerates installation, enhances overall control, and gives installers total confidence on even the most challenging projects.

Choose MDC XR when you want:

- Faster, more efficient installations with MetaGlide[®] XR[™] adhesive technology
- Maximum repositionability during application
- Easier handling around recesses, curves, and complex vehicle shapes

MetaCast[®] MDC XR[™] isn't just easier to install, it elevates the entire wrap experience. Let your next project feel the difference.
